- High output radiators - EN 442 tested and certified
- Factory fitted top grilles and side panels
- High quality finish - white enamel (RAL 9016)
- Comprehensive range - over 240 sizes and outputs
- Operating pressure 10 bars (tested to 13 bars/188PSI)
- Maximum operating temperature 120°C
- Manufactured under BS EN ISO 9001 quality system
- Guarantee: 10 years

The outputs shown on our pricelist can be converted to take into account different operating conditions. The outputs shown under the ΔT_{50} column are based on BS EN442 operating conditions. For ΔT 's other than 50, a correction factor must be applied.

Example: Output required @ ΔT_{45} , you would take the output at ΔT_{50} and then multiply it by 0.872 as per the conversion table.

Installation

- For maximum efficiency, radiators should be fixed at no less than 100mm (4") from finished floor level.
- Pipe positioning guide for manual valve allow 35mm to centre of pipe. For TRV valve allow 45mm to centre of pipe.
- To prevent damage to radiator it is strongly recommended during installation to leave protective packaging on radiator by simply removing lug protecters and pre cut tapping connection.

Water Treatment/Corrosion Inhibitor

It is strongly recommended that, where appropriate, all indirect/closed heating systems are cleansed by a flushing agent and treated with a central heating system inhibitor before installing a Kartell product, according to the specifications of the British Standard for preparation, commissioning and maintenance of domestic central heating and cooling water systems, BS 7593:2019. This is especially important if the product is an addition to an existing system and would ensure the continued efficiency and longevity of the system's components together with the radiator.

Failure to follow this recommendation will invalidate the manufacturing guarantee. For further details please see our KRAD guarantee T&Cs page on our website, QR Code below.
